

# JM SP LIQUID FLASHING RESIN

(White)

**JM Single Ply Liquid Flashing Resin** is a two-part, cold-applied, polyurethane-based product which combines the ease of a liquid application with the strength of a reinforcing scrim. The result is a uniform self-terminating flashing ideal for tying together JM single ply membranes with most common roofing materials.

## ADVANTAGES

- ▶ Ideal for difficult-to-flash and odd-shaped penetrations
- ▶ Works with all JM single ply membranes
- ▶ Very reflective white color is highly UV resistant
- ▶ Mostly odorless, LVOC and solvent-free
- ▶ Pre-portioned packs are ready to go

## FEATURES & BENEFITS

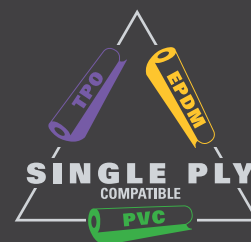

GREAT FOR DIFFICULT PENETRATIONS

ELIGIBLE FOR 20-YR GUARANTEE\*

WORKS WITH ALL JM SINGLE PLY

### PRIMER

Concrete

Metal & Wood

TPO & PVC
