

SBS COOL ROOF SOLUTIONS

WHY INSTALL A JM COOL ROOF?

Installing Johns Manville cool roof systems on your commercial buildings can reduce costs. The highly reflective and highly emissive granulated white cap sheets are proven to be an energy-efficient and cost-effective solution. As with any roof system, make sure your building has an appropriate amount of insulation. While cool roof surfaces work to reduce cooling costs associated with air conditioning during summer months, insulation will also help to keep your occupants cool in the summer and warm in the winter.

JM Granulated Cap Sheets:

	TEST	INITIAL	3-YR AGED**
CRRC®*	Reflectivity (ASTM C 1549)	0.70	0.65
	Emissivity (ASTM C 1371)	0.90	0.91
Rated Product ID: 0662-0042c Licensed Manufacturer ID: 0662 Classification: Product Line			
LEED®	Solar Reflex Index (SRI) - E 1980	85	80

One of the highest SRI on granulated in the industry.

JM Granulated Cap Sheets meet or exceed industry requirements.

*Cool Roof Rating Council ratings are determined for a fixed set of conditions and may not be appropriate for determining seasonal energy performance. The actual effect of solar reflectance and thermal emittance on building construction may vary. Manufacturer of product stipulates that these ratings were determined in accordance with the applicable normal Cool Roof Rating procedures.

**Tested in accordance with Rapid Ratings D7897.

WHY CHOOSE A GRANULATED COOL ROOF FROM JM?

JM has options, depending on your needs for both cost and performance. If your project requires a cool roof, the CR G Cap Sheets are a great option. At 70% solar reflectivity, these products offer nearly three times more reflectivity than a standard white cap sheet. They also can help keep the heat out during hot summer months. Plus, JM CR G Cap Sheets are just as easy to install and repair as standard granulated cap sheets.

For many top contractors, JM CR G Cap Sheets have become the go-to selection for those seeking a solution that works as great as it looks.
