Announcing JM ENRGY 3[®] HD High-Density Polyiso Cover Board

Johns Manville is excited to announce a new cover board for mechanically fastened roof systems. JM [ENRGY 3[®] HD](#) High-Density Polyiso Cover Board is now available!

High Density: At 80 psi, ENRGY 3[®] HD offers high compressive strength and impact resistance. A great lightweight option for fast and easy installation.

Lightweight: ENRGY 3[®] HD is 85% lighter than comparable ½" gypsum cover boards*, offering installation efficiencies where labor and weight are a concern. With over 668 squares per truck, this product reduces freight costs and provides easier hoisting, staging, and maneuvering at the jobsite.

High R-Value (2.5 R): Provides significantly more thermal insulation (R-value) than wood fiber or gypsum boards*.

User Friendly: Allows for simple and efficient scoring, cutting, and snapping. Contractors can achieve precise fabrication in a low-dust environment.

[ENRGY 3[®] HD](#) High-Density Polyiso Cover Board is eligible for JM Peak Advantage Guarantees up to 30yrs.

Product Description	Size	Part Number
ENRGY 3 [®] HD 0.5" 48X96	4' x 8' (1.22 m x 2.44 m)	90038114

Please visit www.jm.com for more information about cover board options available from Johns Manville.
