## Announcing additional sizes of JM Protector® Foam

Johns Manville is excited to announce an expansion of its [Protector Foam](#) offering!

Protector Foam is a dual-density polyiso composite board, [JM Protector HD](#) cover board is bonded to standard-density [ENRGY 3 CGF](#) inline to create a homogeneous product with coated glass facers.

### Advantages:

- Save on installation labor by combining cover board and insulation into a single board at the factory.
- Eliminates the need of adhesive for securing a cover board to insulation below.
- Is a great option for colder climate installations where the use of adhesive may be restricted.

Protector Foam is now available in following thicknesses:

Material	Description
90038862	Protector® FOAM 1.8" 48X48
90029723	Protector® FOAM 2.0" 48X48
90029728	Protector® FOAM 2.5" 48X48
90038863	Protector® FOAM 2.7" 48X48
90029731	Protector® FOAM 3.0" 48X48
90029733	Protector® FOAM 3.5" 48X48
90029735	Protector® FOAM 4.0" 48X48

Please visit [www.jm.com](http://www.jm.com) for more information about composite options available from Johns Manville.

Thank you for your continued business and support of JM products.
