Johns Manville “The Edge” Update

We are excited to share that we have worked with Estimating Edge to update our material templates. These templates are now available to contractors who use “The Edge” as their estimating/takeoff software.

Follow this link for a YouTube video that shows how to upload these templates and make edits to your current parts list: [The EDGE](#)

As the contractor, you will need to upload these templates individually to your software.

Please reach out to the RS Spec Services team to receive a copy of the up-to-date templates and any assistance with uploading: rsspecservices@jm.com

Thank you for your continued support,

Mandy Schweitzer
Director of Owner Services and Marketing
